

# the Steroid Today 2014

- 일시 | 2014년 7월 11일(금), 12:30~20:00
- 장소 | 서울 소공동 프라자호텔(4층) Orchid Hall

# the Steroid Today 2014 PROGRAM

|             |                                                                                                                                                                                                                                                                         |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12:30~13:00 | Registration                                                                                                                                                                                                                                                            |
| 13:00~13:10 | Opening Remarks                                                                                                                                                                                                                                                         |
| 13:10~14:00 | <b>Plenary Lecture</b> : Practical examples of the study of steroid metabolism in tissues<br>– Androgen metabolism and action in breast and prostate cancers<br>( <b>Prof. Hironobu Sasano &amp; Prof. Keely McNamara</b> / Dept. of Anatomic Pathology / Tohoku Univ.) |
| 14:00~14:30 | Diagnostic evaluation of enzyme activity related to steroid metabolism ( <b>Dr. Man-Ho Choi</b> / Molecular Recognition Center / KIST)                                                                                                                                  |
| 14:30~15:00 | Clinical utilities of steroid profiling in children ( <b>Prof. Mi Jung Park</b> / Dept. of Pediatrics / Sanggye Paik Hospital)                                                                                                                                          |
| 15:00~15:30 | Steroid Today Happy Hour                                                                                                                                                                                                                                                |
| 15:30~16:00 | Cholesterol-induced non-alcoholic fatty liver disease and atherosclerosis aggravated by systemic inflammation<br>( <b>Prof. Hong Seog Seo</b> / Cardiovascular Center / Korea Univ.)                                                                                    |
| 16:00~16:30 | Sitosterolemia in Korean children: the clinical significance ( <b>Prof. Eun Gyong Yoo</b> / Dept. of Pediatrics / CHA Univ.)                                                                                                                                            |
| 16:30~17:00 | Steroid measurements in clinical laboratory ( <b>Prof. Junghan Song</b> / Dept. of Laboratory Medicine / Seoul National Univ.)                                                                                                                                          |
| 17:00~17:10 | Coffee Break                                                                                                                                                                                                                                                            |
| 17:10~17:40 | Steroid metabolites in Alzheimer's disease: Veiled markers? ( <b>Prof. Eosu Kim</b> / Dept. of Psychiatry / Yonsei Univ.)                                                                                                                                               |
| 17:40~18:10 | Steroids and viral infection ( <b>Prof. Kyun-Hwan Kim</b> / Dept. of Pharmacology / Konkuk Univ.)                                                                                                                                                                       |
| 18:10~18:30 | Roundtable Discussion                                                                                                                                                                                                                                                   |
| 18:30~20:00 | Dinner and Closing Remarks                                                                                                                                                                                                                                              |
